Kishan Ghadiya

Senior SDET
Ahmedabad, India | ksghadia@gmail.com | linkedin.com/in/kishan-ghadiya | ksghadia.github.io

PROFESSIONAL SUMMARY

Senior SDET with 5+ years in ed-tech QA and test automation who builds AI test agents: cut build verification **75% (2 h to 30 min)**, automated **500+** UI tests and **76 API endpoints**, and shipped **10 releases with zero critical escapes**. Acting QA lead mentoring **5 QA engineers**; owned **3000+** test cases, ~300 execution cycles and ~1500 defects across the Mindspark web platform and Ei Mira Android apps.

SKILLS

Test Automation: Cypress, Playwright, Rest Assured, Postman, Apidog, API testing, REST APIs
Programming: JavaScript, Python, SQL
AI in Testing: Claude Code, MCP, LLM agents for test design, bug verification and test execution
CI/CD and Tools: Jenkins, Git, Bitbucket, Jira, Xray, Agile/Scrum
Databases: MySQL, MongoDB, Elasticsearch, ClickHouse
Testing Types: Regression, functional, UI, cross-browser, mobile (Android, adb), database testing, shift-left testing, root-cause analysis (RCA), defect management, test planning

WORK EXPERIENCE

Senior SDET, Educational Initiatives (Ei), Ahmedabad Jul 2026 – Present

- Automated build verification (BVT) with AI agents: **2 hours to 30 minutes per build (75% faster)**.
- Used AI agents and skills to **roughly halve routine QA effort** across test-case design, bug-fix verification and root-cause analysis.
- Built the team's AI QA agents: bug-fix verifier and spec-driven web tester (Playwright, read-only DB checks, live Xray), extended to Android over adb, with a **44-test** regression suite.
- Acting QA lead for Mindspark 4.0: defined the test case process, reviewed specs and test cases, mentored **5 QA engineers** and ran Automation sprint ceremonies.
- QA owner for **10 Ei Mira releases** with **zero critical escapes**; reported 55 defects, **84% High/Highest**.
- Automated **76 REST API endpoints** in one sprint; led root-cause analysis of **10+ production issues**.

Test Engineer 2, Educational Initiatives (Ei), Ahmedabad Jul 2024 – Jun 2026

- Owned QA of Ei Mira's adaptive learning logic from pilot to production: spec reviews, test plan, sign-off.
- Started Cypress GUI automation for Mindspark and grew coverage to **500+ automated test cases**.
- Ran build verification, regression and APK testing on every Ei Mira build, including phone compatibility.
- Led AI-assisted root-cause analysis of production issues, driving a **permanent adaptive-logic fix**.
- Validated data across MongoDB, Elasticsearch and ClickHouse, catching corrupt attempt records early.

Test Engineer, Educational Initiatives (Ei), Ahmedabad Aug 2021 – Jun 2024

- Owned release testing and sign-off for Mindspark releases and hotfixes, publishing release notes for each.
- Moved the team's test cases into **Jira Xray** and wrote the regression checklist used for every release.
- Tested the Mindspark 1.0 to 3.7 migration across online and offline school servers, including data sync.
- Tested REST APIs (Rest Assured, Postman), cross-browser and school-hardware compatibility.

Junior Executive, Executive (non-QA), Educational Initiatives (Ei) Apr 2019 – Jul 2021

PROJECTS

AI QA Engineer toolkit (Claude Code, MCP): Designed and built an agentic QA plugin with 5 specialist agents and 20 skills for requirement review, Xray test case design, browser test execution, bug triage, regression scoping and QA metrics, backed by eval benchmarks (**30/33 runs pass**) and a self-improving lessons loop. Structure: github.com/ksghadia/ai-qa-engineer-showcase

EDUCATION

B.E. in Electrical Engineering, Dr. Subhash University | 2017

CERTIFICATIONS

Automation Testing Engineer (StarAgile), API Testing using Postman, SoapUI and RestAssured (Udemy), Manual Testing (LambdaTest), Software Testing (Great Learning)
