Kishan Ghadiya

Senior SDET
Ahmedabad, India | ksghadia@gmail.com | linkedin.com/in/kishan-ghadiya | ksghadia.github.io

PROFESSIONAL SUMMARY

Senior SDET (Software Development Engineer in Test) with 5+ years in QA and test automation for ed-tech products: the Mindspark adaptive-learning web platform and the Ei Mira Android apps. Built 500+ automated test cases and AI QA agents that cut build verification from 2 hours to 30 minutes. Acting QA lead mentoring 5 QA engineers; owned 3000+ test cases, ran ~300 test execution cycles, logged ~1500 defects.

SKILLS

Test Automation: Cypress, Playwright, Rest Assured, Postman, Apidog, API testing, REST APIs
Programming: JavaScript, Python, SQL
AI in Testing: Claude Code, MCP, LLM agents for test design, bug verification and test execution
CI/CD and Tools: Jenkins, Git, Bitbucket, Jira, Xray, Agile/Scrum
Databases: MySQL, MongoDB, Elasticsearch, ClickHouse
Testing Types: Regression, functional, UI, cross-browser, mobile (Android, adb), database testing, shift-left testing, root-cause analysis (RCA), defect management, test planning

WORK EXPERIENCE

Senior SDET, Educational Initiatives (Ei), Ahmedabad Jul 2026 – Present

- Automated build verification testing (BVT) with AI agents, cutting it from 2 hours to 30 minutes per build.
- Acting QA lead for Mindspark 4.0: defined the test case process, reviewed specs and test cases, mentored 5 QA engineers with AI testing demos, and ran Automation sprint ceremonies.
- Built AI QA agents the team uses to verify bug fixes and run spec-driven web tests with Playwright, read only database checks and live Xray updates; extended them to Android devices over adb, backed by a regression suite of 44 tests.
- Owned end-to-end QA for 10 Ei Mira releases from April to September 2026, reporting 55 defects (84% High or Highest) with zero critical defects escaping to production.
- Automated API tests for 76 REST endpoints in one sprint and led root-cause analysis of 10+ production issues, verifying each fix on staging and production.

Test Engineer 2, Educational Initiatives (Ei), Ahmedabad Jul 2024 – Jun 2026

- Owned QA of the adaptive learning logic in the Ei Mira Android apps from pilot to production: shift-left spec reviews, test plan, dual-login scenarios and QA sign-off.
- Ran build verification, regression and APK testing on every Ei Mira build, including school-device, lite and phone-compatibility variants.
- Started Cypress GUI automation for core Mindspark flows and grew automated coverage to 500+ test cases, reducing manual regression effort.
- Led AI-assisted root-cause analysis of high-priority production issues, driving a permanent adaptive-logic fix for teacher-led schools.
- Validated data across MongoDB, Elasticsearch and ClickHouse, catching corrupt attempt records, and tested online and offline schools for a state-government tender.

Test Engineer, Educational Initiatives (Ei), Ahmedabad Aug 2021 – Jun 2024

- Owned release testing and sign-off for Mindspark releases and hotfixes, publishing release notes for each; moved test cases into Jira Xray and wrote the regression checklist.
- Tested the Mindspark 1.0 to 3.7 migration and English and regional-language releases on online and offline school servers, including offline data sync.
- Tested REST APIs with Rest Assured and Postman, plus cross-browser and school-hardware compatibility, tracking defects in Jira with log analysis.

Junior Executive, Executive (non-QA), Educational Initiatives (Ei) Apr 2019 – Jul 2021

PROJECTS

AI QA Engineer toolkit (Claude Code, MCP): Designed and built an agentic QA plugin with 5 specialist agents and 20 skills for requirement review, Xray test case design, browser test execution, bug triage, regression scoping and QA metrics, backed by eval benchmarks and a self-improving lessons loop.

EDUCATION

B.E. in Electrical Engineering, Dr. Subhash University | 2017

CERTIFICATIONS

Automation Testing Engineer (StarAgile), API Testing using Postman, SoapUI and RestAssured (Udemy), Manual Testing (LambdaTest), Software Testing (Great Learning)
